

Expressions of interest to join the Goschen Project Community Reference Group

VHM Limited is progressing the **Goschen Rare Earths and Mineral Sands Project** near Lalbert, Victoria — a long-life project that will support local employment, regional investment and shared community outcomes over its operating life.

With all key approvals now in place, VHM is strengthening its commitment to open and transparent engagement by establishing a **Community Reference Group (CRG)** as part of our **Community Engagement Program**.

The CRG will provide a respectful, inclusive forum for local community members and groups to remain informed, share perspectives, and contribute ideas as the Project moves forward.

The Community Reference Group will:

- Provide timely information about Project activities
- Offer a constructive platform to raise questions, feedback and suggestions
- Support meaningful community input into how the Project is planned and managed

The CRG will be independently chaired to ensure open dialogue and balanced discussion. Meetings are expected to be held **quarterly**, with the first meeting scheduled once the group is formed.

Register your interest

Local residents, landholders and community group representatives are encouraged to express interest in joining the Community Reference Group.
